

CAPABILITY STATEMENT

Comite Resources is a team of environmental specialists devoted to developing low cost solutions to a wide range of environmental issues facing Louisiana and surrounding Gulf states. Comite Resources specializes in wetland restoration and in using constructed and natural wetlands to improve point and non-point source water quality.

In addition, we have decades of experience in wetland assessment, monitoring, management and delineation. We also have developed relationships with environmental regulatory agencies to facilitate LPDES, CUP, CWA, SWPPP and other permitting hurdles. Let us help you move your project forward.

THE FULL RANGE OF SERVICES OFFERED BY COMITE RESOURCES INCLUDES:

Environmental Services

Wetland Delineation Constructed Wetlands

- Stormwater Wetlands
- Treatment Wetlands

Wetland Restoration

- Site Assessment
- Baseline Monitoring
- Restoration Design
- Project Management & Monitoring

Wetland Assimilation

- Project Development & Monitoring

Ecological Impact, Monitoring & Management

- Water Quality & Hydrology
- Vegetation & Soils
- Greenhouse Gases
- Wildlife

Environmental Mapping

- Ground-truthing
- Vegetation Communities
- Critical & Suitable Habitat Analysis

Environmental Compliance

Permit Preparation

- LPDES, CUP, SWPPP, CWA Section 404

Assessments

- Environmental
 - EIS, NEPA, Environmental Due Diligence Service
 - Oil Spill & Other Contaminant Assessment & Remediation
 - Phase 1/Phase 2 Environmental Site Assessments
- Biological
 - Threatened & Endangered Species Surveys

Management Plans

- Risk Management Plans
- QAPP & SWPPP Preparation
- Wetland Mitigation Plan Development

Additional Services

Wastewater Treatment System Evaluation

- Troubleshooting Performance Issues
- Increase Plant Reduction Efficiencies Using Novel Technologies

Data Analysis & Management

- Literature Review
- Statistical Analysis
- Database Management
- Report Preparation

Carbon Sequestration

- Project Feasibility & Design
- Implementation
- Monitoring
- Market Analysis

Litigation Support

- Oil & Gas Impact Assessments
- Historical Research
- Data Review & Analysis
- Expert Testimony

FIRM ESTABLISHMENT | DUNS Number: 021547364 | NAICS Code: 541620

Comite Resources was established in 1998 by Dr. John Day initially for the purpose of evaluating, designing, and monitoring assimilation wetlands, a technique that he pioneered in Louisiana. Since this time, the company has evolved to provide a suite of environmental services. Scientists with Comite Resources have over 100 years of combined scientific research and regulatory experience in wetland and coastal environments worldwide. We provide ecosystem-based solutions for projects by designing site-specific strategies through a careful process of field monitoring, data analyses, literature review, and professional collaboration. This unparalleled service is why our company has been chosen by so many to be an integral part of their environmental project team.
